

A) Come nell'esempio, scrivi i numeri formati da...

$3 \text{ da} + 1 \text{ h} + 2 \text{ u} = 132$	$2 \text{ da} + 8 \text{ u} + 1 \text{ h} = \underline{\hspace{2cm}}$
$1 \text{ h} + 5 \text{ u} + 6 \text{ da} = \underline{\hspace{2cm}}$	$3 \text{ u} + 1 \text{ h} + 5 \text{ da} = \underline{\hspace{2cm}}$
$7 \text{ u} + 4 \text{ da} + 1 \text{ h} = \underline{\hspace{2cm}}$	$10 \text{ da} = \underline{\hspace{2cm}}$
$8 \text{ da} + 0 \text{ u} + 1 \text{ h} = \underline{\hspace{2cm}}$	$1 \text{ da} + 1 \text{ h} + 4 \text{ u} = \underline{\hspace{2cm}}$
$1 \text{ h} + 0 \text{ da} + 6 \text{ u} = \underline{\hspace{2cm}}$	$0 \text{ da} + 7 \text{ u} + 1 \text{ h} = \underline{\hspace{2cm}}$

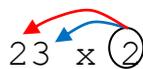

B) Scrivi l'addendo mancante. Calcola a mente.

$30 + \underline{\hspace{2cm}} = 45$	$20 + \underline{\hspace{2cm}} = 120$
$10 + \underline{\hspace{2cm}} = 58$	$80 + \underline{\hspace{2cm}} = 130$
$60 + \underline{\hspace{2cm}} = 91$	$100 + \underline{\hspace{2cm}} = 146$

C) Trova il minuendo. Calcola a mente.

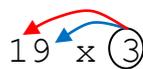

$\underline{\hspace{2cm}} - 23 = 40$	$\underline{\hspace{2cm}} - 10 = 33$
$\underline{\hspace{2cm}} - 20 = 51$	$\underline{\hspace{2cm}} - 9 = 72$
$\underline{\hspace{2cm}} - 30 = 18$	$\underline{\hspace{2cm}} - 40 = 4$
$\underline{\hspace{2cm}} - 16 = 70$	$\underline{\hspace{2cm}} - 21 = 30$
$\underline{\hspace{2cm}} - 50 = 12$	$\underline{\hspace{2cm}} - 60 = 16$

D) Completa l'operazione per calcolare **il doppio** dei seguenti numeri; calcola in riga; scrivi il risultato.

*Esempio*   $23 \times 2 = 46$

$21 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$	$41 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$
$43 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$	$47 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$
$38 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$	$39 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$
$26 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$	$53 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$
	$81 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$

E) Completa l'operazione per calcolare **il triplo** dei seguenti numeri; calcola in riga; scrivi il risultato.

*Esempio*   $19 \times 3 = 57$

$18 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$	$17 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$
$24 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$	$33 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$
$31 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$	$45 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$
$63 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$	$52 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$
	$26 \times \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$

F) Sul quaderno, calcola in colonna con la prova accanto.

$46 + 57 =$	$181 - 79 =$
$8 + 53 + 42 =$	$163 - 58 =$
$17 \times 6 =$	$124 - 103 =$
$26 \times 4 =$
